

# INVITATION TO MASTERCLASS IN VIRTUAL EXCHANGE

*Discover the advantages of Virtual Exchange for  
Education for Sustainable Development.*

**VAMOS Masterclass for Higher Education Institutions**  
**29 November from 16.00 to 17.30 CET (Time where you are?)**

Discover the advantages that Virtual Exchange (VE) can offer you, your institution, and your students. We will illustrate what Virtual Exchange is and how Education for Sustainable Development can benefit from integrating and implementing VE successfully, as is the case within the Erasmus+ Capacity Building Project VAMOS.

We will provide examples of VE, which illustrate how it can provide an accessible, ground-breaking way for students to engage in intercultural learning through the use of technology, while developing employability and other crucial transversal and soft skills.

Anyone interested in exploring the opportunities VE can offer at VAMOS partner HEIs: teachers and staff at VAMOS HEIs, especially the top management, senior staff with internationalisation roles and positions, and those who will be involved in the setting up and implementation of VE projects.
